# PyQ

*Release 5.0.0*

**Jun 11, 2020**

# Contents

PyQ brings the Python programming language to the kdb+ database. It allows developers to seamlessly integrate Python and q codes in one application. This is achieved by bringing the Python and q interpreters in the same process so that codes written in either of the languages operate on the same data. In PyQ, Python and q objects live in the same memory space and share the same data.

PyQ Documentation is available at https://code.kx.com/q/interfaces/pyq/.
